## PROFESSIONAL EXPERIENCE

### Web Developer

Prime Vertex Softwares (Remote) | 2024 - Present

- Developed and maintained responsive, dynamic web applications using the MERN stack.
- Collaborated with cross-functional teams to gather requirements and deliver tailored software solutions.
- Built reusable components and optimized front-end performance using React.js and Bootstrap.
- Integrated REST APIs and ensured seamless data flow between front-end and back-end systems.
- Debugged and resolved complex technical issues, improving application stability and performance.
- Customized WordPress and Shopify themes, enhancing e-commerce functionality and visual appeal.

### Projects

Online Food Delivery System. | Oct 2024- Nov 2024

- Developing a full-featured online food delivery platform with user and admin interfaces.
- Implementing features like food item management, order processing, and Stripe-based payment integration.
- Creating a custom, responsive admin dashboard for seamless website management.

Event Management System. | Sep 2024- Oct 2024

- Built a MERN stack-based event management system with separate Admin and Exhibitor panels.
- Designed and implemented features like user profile management, booking system, and email-based password recovery.
- Ensured responsive UI with Bootstrap and provided real-time feedback using React Toastify.

## Projects

Travel Prestige – Travel Guide Website (React.js). | Nov 2024– Dec 2024

- Designed and developed a sleek, responsive travel guide website to refine front-end development skills.
- Built interactive user interfaces using React.js and optimized for seamless navigation.
- Applied modern UI/UX principles using Figma to create visually appealing and user-centric designs.
- Implemented dynamic content rendering, ensuring a fast and engaging browsing experience.

QCS Global – Laboratory Website (WordPress). | Nov 2024– Dec 2024

- Developed a professional and responsive WordPress-based website for a global laboratory services company.
- Customized WordPress themes and plugins to align with the client's branding and functionality needs.
- Integrated contact forms, service pages, and informational content to showcase laboratory services.

USA Visa Advisor – Immigration & Visa Consultancy Website (WordPress). | March 2025– April 2025

- USA Visa Advisor is an informational and service-oriented website built for a consultancy specializing in U.S. visa guidance and immigration support. Developed using WordPress, the site provides clear and concise details about different U.S. visa categories, application processes, and consultation services. I designed the platform with a professional, trustworthy aesthetic, integrated contact and consultation forms, and ensured multi-device responsiveness for an optimal user experience.
